## Profile

Analytical and detail-oriented technology and business professional with a Master of Information Technology (Business Informatics) and hands-on experience in business analysis, project coordination, digital transformation, and operational analytics across retail and technology environments. Skilled in requirements gathering, stakeholder management, Agile project delivery, user acceptance testing (UAT), SQL, Advanced Excel, Jira, KPI analysis, and process improvement. Proven ability to translate business needs into practical digital solutions, optimize workflows, analyze business performance, and support data-driven decision-making through cross-functional collaboration. Adaptable and results-oriented with international experience working in fast-paced, multicultural environments.

## Professional Experience

### IT Project Intern – WORLDTECH

02/2026 – 04/2026 | Bangkok, Thailand (Remote)

- Gathered, analysed, and documented business requirements while collaborating with stakeholders and developers to ensure solution alignment.
- Coordinated Agile sprint activities, backlog tracking, and progress monitoring using Jira to support on-time project delivery.
- Developed user stories, acceptance criteria, and functional documentation for software development teams.
- Executed User Acceptance Testing (UAT), created test cases, tracked defects, and collaborated with developers to resolve issues.
- Prepared project status reports, technical documentation, and performance dashboards for stakeholders.
- Managed WordPress content updates while collaborating with stakeholders to improve website usability and support business objectives.

### Merchandising Coordinator – City Mart Holding Co., Ltd

02/2020 – 11/2021 | Yangon, Myanmar

- Streamlined inventory coordination across multiple branches and collaborated with suppliers and logistics teams to track orders and resolve delivery issues, improving data accuracy, stock availability, and supply chain efficiency.
- Conducted Data Analytics of weekly and monthly sales using Excel, applying trend analysis and sales forecasting to evaluate customer demand and KPIs, which improved forecasting accuracy and data-driven decision-making.
- Supported campaign planning by coordinating with marketing and store teams, ensuring timely execution of promotional activities and alignment with business objectives.
- Improved operational workflows through process improvement, enhancing cross-department communication and streamlining reporting processes, which increased overall efficiency.
- Led issue resolution by identifying and resolving delivery and stock-availability problems, minimizing disruptions and maintaining smooth operations.

## Education

### James Cook University – Singapore

03/2026

Master of Information Technology (Majoring in Business Informatics)

### University of Greenwich – United Kingdom

02/2020

Bachelor of Science (Business Information Technology)

### Scottish Qualification Authority – Scotland

07/2018

Higher National Diploma in Computing

## Certificates

### Foundations of User Experience (UX) Design – Google

### Foundations of Project Management – Google

### Work Simulation Program (WSP) – TalentGeist (in Collaboration with Odoo) Supported by the National Youth Council (NYC), Singapore

09/2025

## Skills

**Project Management:** Agile (Scrum), Waterfall, SDLC, UAT, Risk Management

**Business Analysis:** Requirements Gathering, Process Improvement, Stakeholder Management

**Technical:** SQL, Excel, Jira, Microsoft Project, WordPress, Figma, Notion, GitHub, Microsoft 365, Microsoft PowerPoint

**Core Strengths:** Problem Solving, Critical Thinking, Collaboration, Adaptability, Presentation & Reporting

Projects Experience

**InnerBalance – Mental Wellness App** 03/2025 – 07/2025

- Led a 2–3 person design team for InnerBalance, owning end-to-end delivery from user research to high-fidelity prototyping.
- Designed and developed a mental wellness mobile app interface using Figma and Miro for user journey mapping and service design.
- Applied HCI and UX principles to create an intuitive, accessible, and user-centered experience.
- Managed iterative design cycles using Agile (Scrum), incorporating user feedback to refine features and improve usability.
- Created wireframes and high-fidelity prototypes, delivering a prototype that improved user engagement by 25% through features such as streak tracking and personalized recommendations.

**NYC X Talentgeist – Strategic Project to Digitise SMES In Singapore** 09/2025 – 09/2025

- Developed and implemented an Odoo-based QR ordering and queue management solution for heritage hawker SMES, improving customer experience, reducing wait times, and streamlining order tracking and daily operations.
- Led project planning and coordination using Agile (Scrum) while conducting business analysis, requirements gathering, and workflow gap analysis.
- Designed a prototype website and delivered a business pitch highlighting scalability, revenue growth opportunities, and risk mitigation strategies.
- Integrated Google Business Profile and TripAdvisor to enhance online visibility and increase customer engagement.

**ICT Project I and II – IT Project (Mobile Game Development using KOPO)** 05/2025 – 12/2025

- Served as Business Analyst and Project Coordinator for a mobile game development project, translating gameplay concepts into user stories and acceptance criteria.
- Coordinated end-to-end IT project lifecycle from requirements gathering to deployment, performing business and system analysis to define requirements.
- Applied Agile and Extreme Programming (XP) for sprint planning, task allocation, and progress tracking.
- Prepared project documentation including requirements, design, and progress reports, and supported implementation and QA processes.
- Conducted functional and usability testing to identify defects, improve performance, and ensure alignment with business requirements.

**WORLDXAI – AI-Powered Web Platform for Digital Sales** 02/2026 – 03/2026

- Led web development initiatives for an AI-powered platform, translating marketing requirements into scalable solutions that improved operational efficiency by up to 80%.
- Designed and developed responsive, user-centric web interfaces and customer-facing features, enhancing usability, accessibility, and overall user experience.
- Conducted structured testing and supported deployment activities, ensuring system performance, reliability, and a successful go-live.
- Coordinated stakeholder communication, gathered requirements, prepared project reports, and managed risks and issues to ensure alignment and smooth project execution.
